

During the week of 6 to 10 May, ISO TC46/SC11 met in Berlin. They were days of intense work

Working groups WG8 & WG9, led respectively by Judith Ellis and Carlota Bustelo, and developers of ISO 30300 series, have decided to join forces and focus efforts on the development of the implementation guide (future ISO 30302), postpone for later work on other products.

The new ISO Directives require an initial justification study for each new product to be approved in advance.
The decision

of the Subcommittee
was
to continue
working on the draft
while
processing the
approval of
justification study

,

and in this way
to launch
the first ballot
with a
fairly consolidated
draft

.

Depending on the
comments to be received
, the
drafting period
will be more or
less long
, but
publication
can be expected at least until late
2013 or
early 2014

.
