

For the moment the series ISO 23081 records metadata standards is closed. Since the first publication of

Part 1

in 2004

, these standards have

led the development of

a sound basis for

development

of

metadata

framework

needed for the

proper management of

electronic records.

- ISO 23081-1, Principles, first published in 2004 as a technical specification, passing in 2006 to

be

an international standard

, ratified

in 2010.

- ISO 23081-2, Implementation and Conceptual issues also published as a technical specification in

2007, rising

in 2009 to

be

an international standard

- ISO 23081-3, is a technical report, which proposes a method of self-assessment for metadata records management framework

.
It was published in 2011 and the text of the standard is accompanied by an Excel spreadsheet, which checklists in the form of questions, which can be completed with a score and produce a n evaluation report of the organization with regard to records metadata

The first two are translated and adopted as ISO UNE, and the third will be soon.

Since last May, the ISO working group, leaded by Hans Hofman, that has worked TC46/SC11 for 10 years in these rules has terminated its work. It was a plesuare to be part of it!
