

This past July I had the opportunity to be invited to Colombia to speak on ISO standards in two different events organized both by the [Colombian Society of Archivists](#)

:

- The first one was held in Bogotá in the magnificent seat of the **Archivo General de la Nación**. It was a 7-hour

workshop on ISO 30300 and ISO 14589 in Colombia and in the world

.

The turnout was a success, filling the capacity of 200 people

.

The Colombian professionals are very interested in standardization and especially in understanding the differences between ISO 30300 and ISO

15489,  
which  
part one has  
recently  
been  
adapted and adopted  
in  
Colombia

.

- The second took place in Bucaramanga in the context of the **Congreso Nacional de Archivistica** where I explained in a paper the main requirements and keys aspects of the family of ISO 30300. I also listen to other high level presentations on various aspects related to standardization exposed by other speakers

.  
The audience  
from several  
points  
of  
Colombia  
thanked  
very much the  
practical  
aspects  
of all interventions.

The visit not only made possible to meet again with dear colleagues, but also to state that Colombian professionals are sufficiently prepared to participate actively in the international standardization work

.

We wait you at  
ISO  
TC46/SC11  
!
