

[ESAGED](#) , Escuela Superior de Archivística y Documentación, linked with Universitat Autònoma de Barcelona, has been the first organization to obtain **ISO 30301** certification .

The certificate has

been

granted by

[IGC](#)

International Global Certification.

To all who have worked on this series of standards is a good new. The ESAGED has a strong commitment

with ISO

30300,

developing a

**specialized
training program**

,

which

first edition

has already

been successfully completed

.

It was a

risky

decision

in times of

crisis.

I participated

as a teacher in

this training

and

students

have

found

great interest

to the news

of the proposals

, particularly

the change

of
viewpoint.

For me the real value of ESAGED certification is the understanding that a School providing a specific training plan on ISO 30300, should

lead by example

.
The implementation of the standard and subsequent certification means that ESAGED staff knows of what they speak when preparing the case study for students

.
.

Now the ISO 30301 training program goes to **Mexico**, where we are hosted by the [Escuela Mexicana de Archivos](#)

.

And interest continues growing up...!.
