

The annual meeting of [ISO TC46- Information and documentation](#) was held in Paris in the first week of June (2013). Some months ago I thought it was a great opportunity for presenting the

ESAGED

experience in the implementation and certification of

ISO 30300

. So I proposed to

[Ramón Alberch](#)

, Director of ESAGED and the most important part of this story; to

[Michel Cottin](#)

, Head of French Delegation and organizer of the meeting which was held in one of the buildings of Orange, the company where he works; and to

[Agnes Simai](#)

, Secretariat of

[ISO TC46/SC11](#)

.

The result was a double presentation:

1) The first one, open to the public and sponsored by [Orange](#) , [AFNOR](#) , [AAF](#) y [ADBS](#) . The audience was more than 80 attendees from the most important French companies and also from Government, divided between records professionals and experts in quality and other management systems.

They ask me to introduce with a short presentation on our **AENOR** Spanish Committee.

iid=23023607&doc=presentacionparis04062013-130615062431-phpapp01]]{/slideshare}

But the most important part was Ramon presentation, which is published in [ESAGED website](#) .

We did it in French, mine a little rusty Ramons's much better, which was great appreciated by the audience. At the end and interisting question/answer session about the ESAGED

experience and certification process.

2) The second one in the **TC46/SC11 Plenary**, where delegations of all countries meet to approve resolutions arising from four days of hard work . There was more thn 50 experts form 13 different countries.

Ramón made his presentation in English, it is published together with Spanish and Catalan versions in the [ESAGED website](#) .

At the end a pair of questions about the certification audit process and about the competence and training of external auditors. .
